# Funky fridge makeover

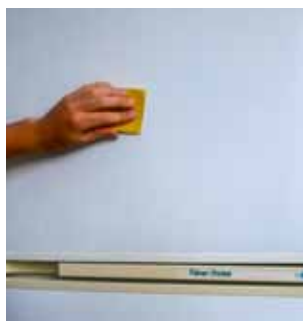

Is your fridge looking dated and dull? Turn an eyesore into a conversation starter with this clever chalk paint transformation

before

## YOU WILL NEED

- A fridge in good working condition
- Light sandpaper
- A soft cloth
- Paintbrushes
- 500ml pot of Resene Waterborne Smooth Surface Sealer
- 1 litre of Resene SpaceCote Low Sheen Waterborne Enamel Chalkboard Paint
- Masking tape (optional)

### Step one

Check that your fridge is in good working order and that all the seals are intact. Sand the entire paintable surface using a light grade sandpaper. Once the sanding is complete, wipe down all surfaces with a damp but well wrung out cloth.

### Step two

Cover all paintable surfaces with a light, even coat of Resene Waterborne Smooth Surface Sealer. Allow at least two hours to dry.

### Step three

Add a top coat over all paintable surfaces using a chalkboard version of Resene SpaceCote Low Sheen Waterborne Enamel. We chose the soft blue tones of Resene Wanaka.

### Get the look:

If you find it tricky cutting in using a fine paintbrush, cover any edges with masking tape before adding your top coat. Ensure you remove the tape before the paint dries.
