Resene Whites & neutrals

Resene

the paint the professionals use

A collection of colours ranging from
brightest whites to creams, beiges
and monochromatic greys and blacks,
ideal on their own or as a contrast
to bolder colours.

Inspired by our local landscapes,
the subtleties of the natural environment
are captured in this range.

Whites and neutrals are the
perfect backdrop to any setting,
both interior and exterior,
contemporary and traditional.

Picture to palette

Not sure which colour to choose? Turn your favourite photo into a Resene colour palette using the free online Resene Palette Generator. Using your photo, the Resene Palette Generator creates a colour palette of Resene colours that reflects the colours in your picture. You can use your favourite pictures to inspire your colour schemes. Or scan in a favourite flower, shell or painting and use that as inspiration for your next colour palette. Try it out for yourself at www.resene.com/picturepalette.

Explore a colour library

View an extensive range of Resene colour swatches in the online Resene colour library, then download the ones you like. Once you have found your favourites, order testpots online and try them out for yourself in the real world. Or browse through the in-store libraries of colour that can be found at most Resene ColorShops and resellers. With thousands of variously coloured A4 swatches to pore over, you're bound to find one that suits.

'See' the finish

Virtual painting with Resene EzyPaint allows you to visualise the entire colour scheme before the redecorating even starts. Available free from the Resene website, www.resene.com/ezypaint.

Put your colour to the test

No matter how you select your colours, always use testpots to confirm your choices in the area you are planning to paint. Resene testpots are available from your local Resene ColorShop or reseller or you can order online from the Resene website.

Choose the right product

We have an extensive range of paints, coatings, wood stains and more to suit your decorating projects. View the Resene Recommended paint systems brochure or ask Resene staff for help choosing the right paint system for your project.

Keep your project cooler

If you are planning to use dark colours outside consider investing in a Resene CoolColour. Colours made using Resene CoolColour technology reflect more heat than a standard colour minimising the stress on the coating and the substrate and reducing unwanted heat buildup inside. Check with Resene ColorShop or reseller staff to see whether a Resene CoolColour is right for your project.

Keep it looking good

Annual washing will help maintain the fresh appearance of your paintwork. Follow the recommendations in the Resene Caring for your paint finish brochure or on the Resene website to keep your paint finish looking its best.

Choose to help the environment

You can minimise the effect your next decorating project has on the environment by choosing one of the Resene range of Environmental Choice approved products. Our commitment to sustainability led to Resene being named Sustainable Business of the Year at the 2010 National Sustainable Business Awards.

Enjoy the Resene Promise of Quality Guarantee

Enjoy the Resene Promise of Quality Guarantee on a wide range of Resene premium paints. See your Resene ColorShop, reseller or the Resene website for a copy.

Be PaintWise

For tips on minimising the impact of your decorating on the environment see www.resene.com/paintwise.

Remember you only get authentic Resene colours when you use Resene tinters in Resene paint bases. Resene Non VOC tinters and the true Resene colour formulations are unique and only available from Resene. So make sure you insist on genuine Resene products and tinters for your project.

Key: CB = Cool black D = Deep L = Light M = Mid
MI = Mid grey O = Ochre P = Pastel U = Ultra deep
W = White

cc = Also available as a Resene CoolColour™. A change in tone or product may be required for some colours to achieve a Resene CoolColour effect. CoolColour and standard variants of a specific colour use different pigment combinations by necessity to achieve a match to the same Resene master colour standard. This can cause slight colour differences depending on the degree and type of light, which naturally varies with the time of day.

Note 1: The approximate light reflectance value (LRV) of a colour indicates the amount of visible light that a colour will reflect. Black has a light reflectance value of 0% and absorbs all light. The surfaces are consequently very dark and can get very hot. In contrast, white has a light reflectance value of 100% and keeps a building light and cool. All colours fit within these two extremes. A Resene CoolColour™ is formulated to reflect more of the sun's energy, improving the colour's heat and total solar reflectance (TSR) properties compared to a normal colour, keeping the coating, substrate and building cooler.

Note 2: Mid to dark colours are not suitable for some exterior substrates and if used may cause damage to the substrate, such as warping, checking and premature failure. Always check with the substrate supplier prior to commencing any work to ensure colour selections fit within their guidelines. Resene also manufactures Resene CoolColour technology and this may increase the colour range that can be suitable over some heat sensitive substrates - refer Resene for further information.

Note 3: Tones listed above are subject to change if colours are reformulated.

Note 4: Colours may be available in selected products or sizes only. Check with Resene ColorShop or Reseller staff to ensure your selected colour is available in the product and/or size you require.

Note 5: Colours marked with * have been matched to the equivalent COLORBOND® or COLORSTEEL® colour samples in 2009. If an exact match is required we recommend you check your chosen colour against the actual sample of the product prior to purchasing. COLORBOND® is a registered trademark of Bluescope Steel Limited. COLORSTEEL® is a registered trademark of New Zealand Steel Limited.

Note 6: This colour chart is finished with Resene SpaceCote Low Sheen waterborne enamel, a product ideally suited to kitchens, bathrooms and broadwall areas.
