

This waist-height bench will be your ideal companion when you're busy taking autumn cuttings.

WORDS & PHOTOS MARK RAYNER

BROUGHT TO YOU BY

RESENCE

the paint the professionals use

You will need

- 50mm exterior screws
- 90mm exterior screws
- 60mm x 10mm x 1400mm piece of treated timber moulding
- 100mm x 50mm treated timber cut to the following lengths:
- 4 x 900mm (legs)
- 2 x 690mm (side edges)
- 1400mm (back edge)
- Tongue and groove landscaping timber cut to the following lengths:
 - 4 x 1200mm (base and front shelf)
 - 2 x 1300mm (front and back)
 - 2 x 560mm (sides)
 - Paint stirrer
 - Paintbrush
 - Pencil
- Resene Waterborne Woodsman tinted to Resene Kwila
 - Sandpaper
 - Saw
 - Screwdriver
 - Set square
 - Tape measure

For more on paints and stains phone 0800 RESENE (0800 737 363) or visit your Resene ColorShop or www.resene.co.nz

STEP ONE

Measure and mark all the pieces of timber to the lengths required.

STEP TWO

Cut the lengths to size with the saw and smooth any rough edges with sandpaper.

STEP THREE

On a level surface, fit three of the 1200mm lengths of tongue and groove landscaping timber together, as shown, to form the base of the bench.

STEP FOUR

Attach the two 560mm lengths of tongue and groove landscaping timber into position, as shown, to form the sides of the bench, fixing with 90mm screws.

STEP FIVE

Attach the two 1300mm lengths of tongue and groove landscaping timber into position, as shown, to form the front and back of the bench, fixing with 90mm screws.

STEP SIX

Turn the bench upside down and attach the four 900mm lengths of timber into position, as shown, to form the legs, fixing with 90mm screws. Use a set square to ensure the legs are at right angles.

Handy hint

Drilling pilot holes first with a long drill bit will make it much easier when screwing the pieces of wood together.

Herés another idea

This project could also be used as a raised planter bed – simply drill drainage holes in the base before planting up with your favourite potted colour.

Top tip

If your bench will be out in the hot sun, consider using a Resene CoolColour version of your colour to reflect more heat and keep your bench cooler.

STEP SEVEN

Turn the bench the right way up and attach the two 640mm lengths of timber and the 1400mm length of timber into position, as shown, to form the side and back edges, fixing with 90mm screws.

STEP EIGHT

Attach the final 1200mm length of tongue and groove landscaping timber into position, as shown, to form the front shelf, fixing with 90mm screws – ensure the 'groove' side is facing the front.

STEP NINE

Attach the piece of timber moulding into position, as shown, to neaten the front edge, fixing with 50mm screws.

STEP TEN

Carefully stir the Resene Waterborne Woodsman tinted to Resene Kwila.

STEP ELEVEN

Apply two coats of Resene Waterborne Woodsman tinted to Resene Kwila to the potting bench, allowing two hours for each coat to dry.
