Ways with wood,  
with Mark Rayner – 21

Exterior

Transform a simple wall planter into something special with Resene Woodsman penetrating oil stain.

### You will need:

- Clean and dry lint-free cloth
- Damp cloth or sponge
- Latex gloves
- Paintbrush
- Resene Woodsman penetrating oil stain tinted to Resene Japanese Maple
- Sandpaper
- Turps for washing brush
- Wooden wall planter

#### Step one

Lightly sand the outside and inside of the wall planter, following the direction of the grain, as shown.

#### Step two

Wipe off any sanding dust with a damp cloth or sponge, and allow to dry.

#### Step three

Apply one coat of Resene Japanese Maple to the inside of the planter.

#### Step four

Apply one coat of Resene Japanese Maple to the outside of the planter, taking care not to get any on the metal bands. Wash out brush using mineral turps.

#### Step five

Carefully wipe off any excess oil stain from the inside and outside of the planter using a clean and dry lint-free cloth. Leave to dry for 24 hours.

#### Step six

Apply a second coat of Resene Japanese Maple to the inside and outside of the planter and wash out brush using mineral turps.

#### Step seven

Again, carefully remove any excess oil stain with the clean cloth. Leave to dry for 24 hours.

#### Step eight

Hang your planter on an outside fence or wall using a sturdy galvanised nail or hook and plant up with good quality potting mix and your favourite 'potted colour'.

### To get the look:

Mark stained the background shed wall with Resene Waterborne Woodsman penetrating oil stain tinted to Resene Evergreen.

### Other ideas:

For a darker look use Resene Woodsman penetrating oil stain tinted to Resene Pitch Black.
