Resene Kwila Timber Stain

Rejuvenate, enhance and protect your timber deck or outdoor furniture with Resene Kwila Timber Stain. Ideally suited for new or weathered Kwila, it is also ideal over other exotic hardwoods, adding colour to the timber while still allowing the natural grain to show through. A Resene Kwila Timber Stain finish will typically require maintenance after 1-2 summers.

Kwila Brown

Resene Woodsman for decking

Resene Woodsman is available in 25 hues in a solventborne variant perfect for wooden decking areas and furniture. All colours on this chart marked with an asterisk* are available in solventborne Resene Woodsman. Surfaces coated in solventborne Resene Woodsman require recoating every 2 summers.

Resene

water
borne

Woodsmen

penetrating oil stain

Resene Waterborne Woodsman is a new approach to wood stains matching the needs of timber to the desire to achieve the most natural appearance possible. Maximum mould resistance has been achieved through the inclusion of powerful fungicides.

With an adaptable formulation, Resene Waterborne Woodsman is suitable for use on a wide range of exterior timber substrates including:

- Beams
- Plywood and Profiled Sheets
- Dressed and Rough Sawn Timber
- Weatherboards
- Fences

Resene Waterborne Woodsman is easy to apply and requires minimum surface preparation. For **new timber**, ensure surface is dry and free from dirt, dust and loose fibres. For **exposed timber** (greater than one week), remove any gross contamination and semi-detached cellulose fibres, and treat the surface for mould using Resene Moss & Mould Killer (see Data Sheet D80). For **existing stained surfaces**, remove all the weakly adhering coating by sanding and treat the surface for mould using Resene Moss & Mould Killer.

Apply two coats of Resene Waterborne Woodsman by brush, roller or spray following the recommended coverage rates below. During application stir the contents of the can frequently to ensure even distribution of colour. When the job is complete, clean up with water when wet or mineral turps when dry.

Typical coverage

Timber type	First coat	Second coat
Badly weathered timber	3-4 square metres per litre	5-7 square metres per litre
Rough sawn timber	4-6 square metres per litre	9-11 square metres per litre
Dressed timber*	10-12 square metres per litre	12-14 square metres per litre

* For dressed timber, apply a third coat 12-14 square metres per litre after about 3-6 months. Resene Waterborne Woodsman will require maintenance after two summers.

All colours on this chart are shown in Resene Waterborne Woodsman. A smaller selection of colours is available in solventborne Resene Woodsman, an exterior wood stain ideal for all decking areas. (If a non-slip finish is required Resene Non-Skid Deck & Path is recommended).

The Resene Woodcare range offers do-it-yourself and trade professionals products suitable for almost every interior and exterior timber application. For information on our range of other Woodcare products, including Resene Waterborne Colorwood, Lumbersider, Qristal Clear Finishes, Aquaclear and Polythane, contact your nearest Resene ColorShop or Reseller. For further technical information on Resene Waterborne Woodsman see Data Sheet D57a and for solventborne Resene Woodsman, see Data Sheet D57.

NB: The final finish will vary depending on the timber you are staining. Always test your chosen colour on a representative sample of timber. Resene testpots are available from Resene ColorShops and Resellers nationwide. Stains require regular maintenance. While this maintenance is required more regularly for stained surfaces than painted surfaces, the lower level of preparation required makes maintenance work easier to complete.

Colour it

Two coats of Resene Lumbersider will add colour to your fence, deck, outdoor furniture or walls in next to no time. Check out the Resene Lumbersider Chart for some earthy tones perfect for the great outdoors.

Revive your roof

Revive your faded roof and boost your roof's defence against the elements with Resene Hi-Glo gloss acrylic. Resene Hi-Glo is made with UV-resistant pigments and tough acrylic polymers to give a long-life high gloss finish on new primed or previously painted roofs. See the Resene Hi-Glo colour chart for durable roof colour choices.

Step out

Giving your paths and steps a fresh coat of paint can do wonders for the overall look of your entranceway. Simply wash down the existing coating, remove any loose flaking material and recoat using two coats of Resene Sidewalk. Or for a more natural look, add colour to cementitious surfaces with Resene Concrete Stain, which is designed to penetrate the surface of concrete and masonry to form a tough low sheen finish that enhances the natural texture of the concrete. See the Decks, Paths, Driveways and Recreational Areas colour chart for a full range of paving paints and stains.

Get a grip

Make trafficable areas safe and non-slip with Resene Non-Skid Deck and Path, designed to provide a comfortable walking surface for all interior and exterior situations where a non-skid finish is required. Available in a desirable low sheen finish, Resene Non-Skid Deck and Path may be tinted to complement existing décor, both inside and out. The finish has a comfortable grit texture to give feet and shoes something to grip onto, reducing the risk of accident no matter what the weather.

Splash out

After a hard day's work, relaxing in a swimming pool is always popular. Resene Swimming Pool Paint has been specially designed for direct application to concrete swimming pools. A pool coated in Resene Swimming Pool Paint 'Magic Blue' will be less affected by chemicals used for treating pools than traditional pigmented pool finishes. The result is a longer lasting colour, giving you more time to enjoy your pool because you'll spend less time repainting it.

Plant it

Textured, colourwashed, painted or stained... Resene has a wide range of products suitable for decorating planters. Available in hundreds of colours, Resene testpots allow you to add colour to your garden planters without being left with litres of excess paint.

Opt for a natural look

Whites and neutrals are popular teamed with the dead flat mineral effect finish of Resene AquaShield. Colours are designed to lighten with exposure resulting in a natural weathered appearance to blend beautifully with the landscape. Ideal for exterior concrete on buildings and as landscaping features.

Or go mediterranean

The time-worn strength of sandstone with the mellow patina of age has been recreated in Resene Sandtex. Perfect for beautifying and protecting concrete both inside and out, this very versatile finish can be used to reproduce a variety of finishes from aged render effects through to natural limestone and sandstone finishes. The fine sandstone texture adds an extra dimension to the coating and effectively disguises minor surface blemishes without changing the basic architectural concept. Perfect in the great outdoors, on planters or as an interior feature.

'See' the finish

Virtual painting with Resene EzyPaint allows you to visualise the entire colour scheme before the redecorating even starts. Resene EzyPaint can be downloaded free from the Resene website www.resene.co.nz (NZ) or www.resene.com.au (AUST) or purchased on CD-Rom from your local Resene ColorShop or Reseller.

Put your colour to the test

No matter how you select your stain colours, always use testpots to confirm your choices in the area you are planning to stain. Resene Waterborne Woodsman testpots are available from your local Resene ColorShop or Reseller or you can order them online from the Resene website.

Choose to help the environment

You can minimise the effect your next decorating project has on the environment by choosing one of the Resene range of Environmental Choice approved products.

Keep it looking good

Annual washing will help maintain the fresh appearance of your paintwork. Follow the recommendations in the Resene Caring for your Paint Finish brochure or on the Resene website to keep your paint finish looking its best.
