

It's easy to create this mini sandpit with a little bit of Resene know-how.

★★★ Difficulty level ★ easy ★★ moderate ★★★ challenging

Toys and Games  
with Mark Rayner – 39

### You will need:

- 90mm decking nails
- 150mm x 40mm timber (approx 700mm)
- Electric saw
- Fence capping (approx 1.9m)
- Hammer
- Hand saw
- Paintbrush
- Pencil
- Resene Lustacryl tinted to Resene Tomorrow
- Resene Quick Dry
- Sandpaper
- Tape measure
- Tongue and groove landscaping timber (approx 2.6m)

#### Step one

Measure, mark and cut the tongue and groove landscaping timber into two 700mm lengths and two 600mm lengths.

#### Step two

Assemble to form a rectangular frame, as shown, fixing at each corner with 90mm decking nails.

#### Step three

Measure, mark and cut the piece of 150mm x 40mm timber to fit along one edge to form a ledge seat, as shown, and fix into position with 90mm decking nails.

#### Step four

Measure, mark and cut three lengths of fence capping to fit around the top edges of the sandpit.

#### Step five

Using a hand saw, cut a little of the 'groove' from the back corners, as shown, to neatly accommodate the fence capping.

#### Step six

Fit the pieces of fence capping into position, fixing with 90mm decking nails. Smooth any rough edges on the sandpit using sandpaper.

#### Step seven

Apply one coat of Resene Quick Dry to the sandpit and allow to dry.

#### Step eight

Apply two coats of Resene Lustacryl tinted to Resene Tomorrow to the sandpit, allowing two hours for each coat to dry.

**To get the look:**  
Mark painted the background wall with Resene AquaShield tinted to Resene Dutch White.

**Other ideas:**  
For a vibrant orange effect paint the sandpit with Resene Lustacryl tinted to Resene Hi Jinx.
