# Vectorworks

Vectorworks is a long established CAD suite produced by Nemetschek. Nemetschek is the largest supplier of Architectural software in Europe.

The Vectorworks Designer Suite comprises Fundamentals, Architect, Machine Design, Landscape Design and Spotlight (Theatre Lighting).

The products in the Vectorworks family feature the Siemens Parasolids Engine giving it full parametric capability, a NURBS 3D modelling suite and the amazing Cinema 4D Rendering Engine.

The Resene Range is an ideal resource for use with this enhanced rendering capability and will allow designers the opportunity to produce stunning designs for their clients.

Contact Megabits for more information on Vectorworks.

Update January 2012.  Resene files for Vectorworks are now broken down into 14  ranges.  Download the .zip file and extract the files. Or download individual ranges.

**I**nstructions
- Download instructions as pdf.

**For MAC**
Close VW
In the location below delete the existing resene.xml file.
Then place the required file or files  in the following location
Applications>Vectorworks XXXX>Libraries>Defaults>Colour Palettes (where xxxx is your current version i.e. version 2011, 2012 etc)
Before inserting the new files you will need to delete the existing file in this folder entitled "Resence.xml"

Restart Vectorworks

**For Windows**
