

You will need:

- Metallic stars
- Paintbrushes
- Piece of MDF (ours measured 400mm x 600mm)
- Resene Blackboard Paint
- Resene Multishield+ gloss
- Resene Quick Dry Waterborne Primer Undercoat
- Space stickers

Step one

Prime the piece of MDF with one coat of Resene Quick Dry and allow to dry.

Step two

Paint the MDF with two coats of Resene Blackboard Paint – allow at least two hours to dry between coats.

Step three

Apply a generous coat of Resene Multishield+ gloss around the left hand edge of the blackboard and use this to fix the metallic stars in place.

Step four

Continue in the same way applying stars along the lower left hand corner and along the bottom edge. Leave to dry for two hours.

Step five

Starting from the right hand edge apply a few space stickers to the blackboard.

Step six

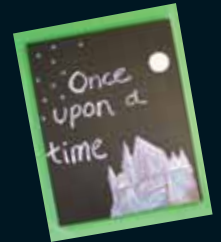

Continue applying stickers along the left hand side and top edge of the blackboard.

Use Resene Blackboard Paint and metallic stars and stickers to create a groovy space-themed blackboard.

Top tip:

Space stickers and metallic stars are available from most discount stores and stationery shops.

Here's another idea:

Create a night time fairytale scene with some blue metallic stars and a cut out castle and moon from an old picture book, gluing these into position with PVA glue.
