

Difficulty level ★★ easy ★★ moderate ★★ challenging

Resene kids art with Mark Rayner – 132

### You will need:

- Coloured masking tape
- Paintbrushes
- Piece of cardboard measuring 25cm x 50cm
- Resene Art Action Quick Dry
- Small bulldog clip
- Resene testpots of the colours of your choice; Mark used Resene Bright Spark and Resene Reverie
- Scissors to trim the masking tape

**Step one**  
Fold the piece of cardboard in half, as shown.

**Step two**  
Apply one coat of Resene Art Action Quick Dry to one side of the cardboard and allow to dry.

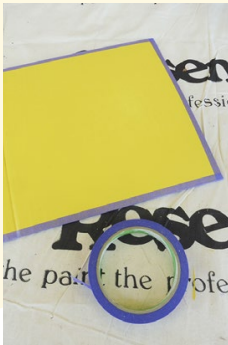

**Step three**  
Apply one coat of Resene Art Action Quick Dry to the other side of the cardboard and allow to dry.

**Step four**  
Paint one side of the cardboard with Resene Bright Spark and allow to dry.

**Step five**  
Paint the other side of the cardboard with Resene Bright Spark and allow to dry. In the same way, apply a second coat of Resene Bright Spark to both sides of the cardboard and allow to dry.

**Step six**  
Place a strip of coloured masking tape around each edge of the piece of cardboard, as shown. Trim the ends of the masking tape with scissors – you might need a grown up to help with this bit.

**Step seven**  
Paint 'My Ideas File' on the front of the file using Resene Reverie and allow the paint to dry.

**Step eight**  
Place the small bulldog clip on the edge of the file to keep it shut. Now get thinking!

Create your very own ideas file where you can store notes, drawings, clippings and even photographs.

### Here's another idea:

This photo file was painted with Resene Bright Red and Resene Freelance.

### Top tip:

If you're using corrugated cardboard it's much easier to fold it in line with the corrugations rather than across them.
