

### You will need:

- Large paint tin lid (we used one from a 4 litre Resene paint tin)
- Low tack masking tape
- PVA glue
- Resene Quick Dry
- Resene testpot of Resene Tree Frog
- Seven cardboard toilet roll tubes

#### Step one

Arrange the toilet roll tubes into a group, as shown, and hold together with low tack masking tape.

#### Step two

Fix the toilet roll tubes to the paint tin lid using PVA glue and allow the glue to dry.

#### Step three

Remove the masking tape and apply one coat of Resene Quick Dry to the desk tidy, allowing two hours to dry.

#### Step four

Apply two coats of Resene Tree Frog to the desk tidy, allowing two hours for each coat to dry. How cool is that?

Transform a few toilet roll tubes into this handy desk tidy with a little bit of help from Resene.

#### Top tip:

For a rectangular look, you could use cardboard toothpaste cartons with the ends cut off.

#### Here's another idea:

This nifty desk tidy was made from a wide cardboard tube stuck to a smaller paint tin lid and painted with Resene Fizz.
