# DARE TO GO DARK

*Take cosy to another level by adding rich greys and greens to your bedroom's canvas.*

Most of the time spent in the bedroom is at night, making this the perfect place to go dark and dramatic. To get a velvety rich effect, use Resene SpaceCote Flat instead of low sheen. It absorbs more light, making the room look richer. Painted in Resene Nocturnal, a rich deep grey, and anchored by floors in the grey-green Resene Viktor, this bedroom is the definition of cosy. If you feel the room will look too closed in, paint the ceiling in a white, such as Resene Alabaster, and include light-coloured furniture with warm undertones. Dark walls ensure a space doesn't feel empty and is a lovely, cohesive backdrop that helps art and plants to stand out. View the Resene colour and wallpaper collection at Resene ColorShops and resellers. Please view a physical Resene colour sample before making your choice.
